PRODUCER OF ROLLER BLINDS SYSTEMS

www.sparrowblinds.com

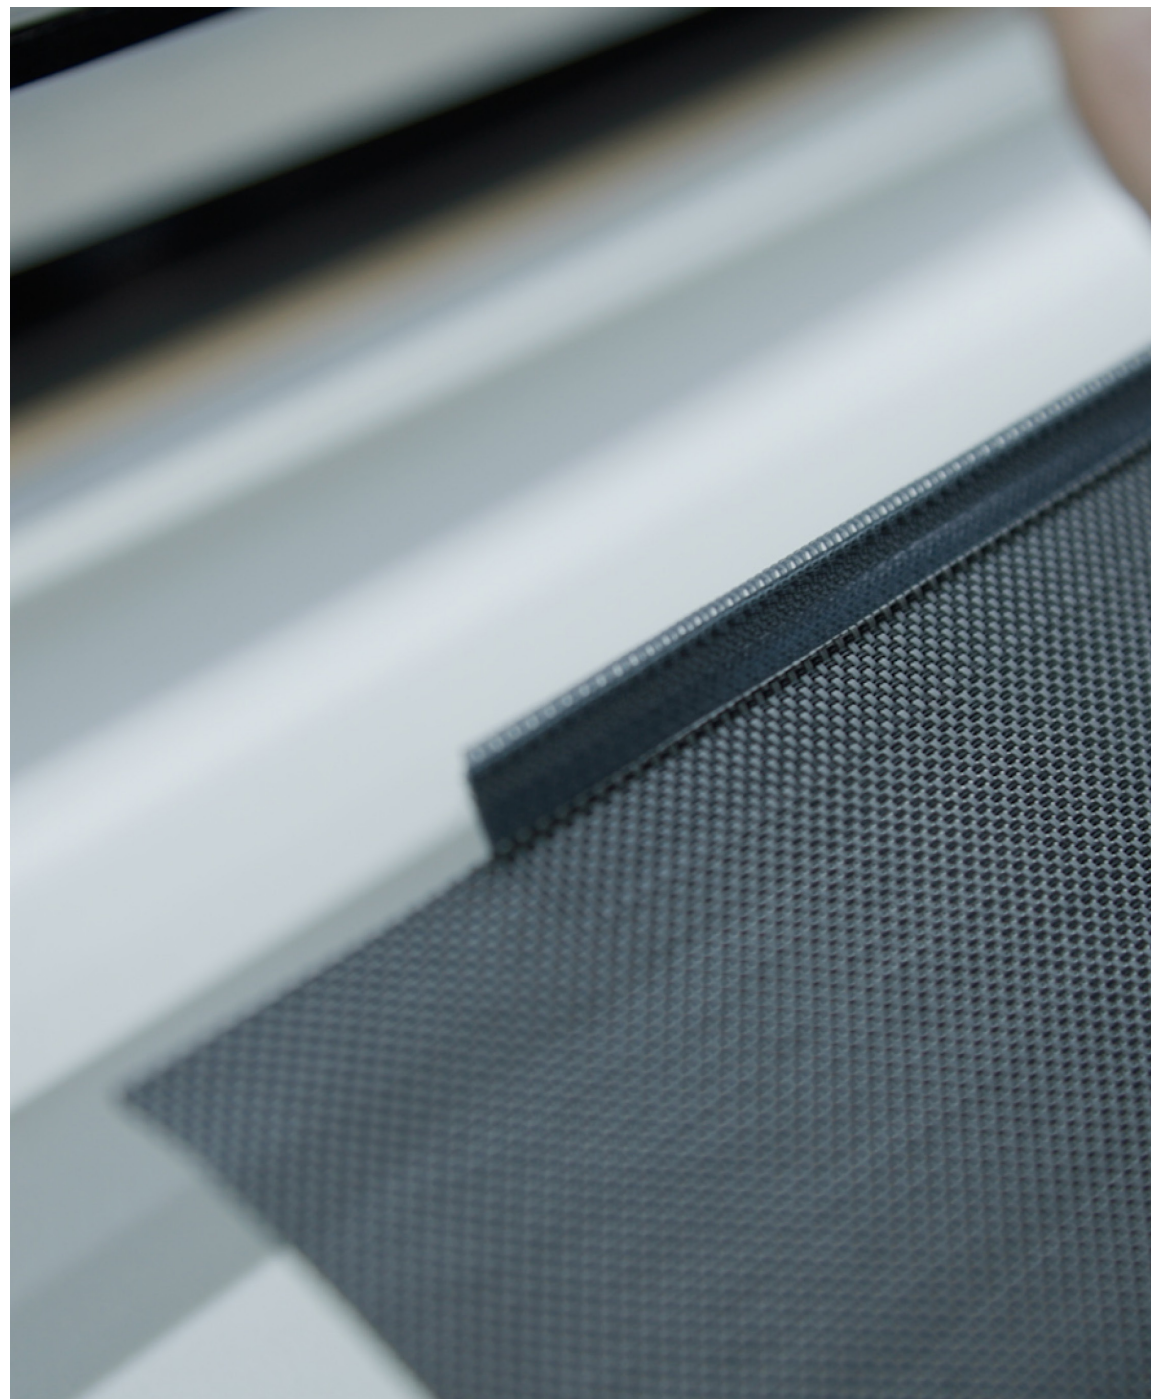

About us

Sparrow Blinds is a unique brand specializing in providing the highest quality window shading solutions. We are a leader in the production and distribution of **fabric roller blinds and Screen blinds**, serving a wide range of customers in Poland and Europe.

Our company is known for creating sunshades with solid finishing and attention to every detail. Each product in our offer is handmade to meet the **highest aesthetic and functional standards**.

We are flexible and adjust our production to the individual needs of the customer. In addition, we offer **customization of Silhouette type blinds** to fit your unique requirements. Our advanced logistics system ensures not only excellent quality but also the **safety of transporting delicate materials**.

Screen fabric

PROPERTIES

Screen Fabric is a unique combination of polyester and polyvinyl chloride, providing **UV protection** at the level of **95% - 99%**. It is a high-quality material, characterized by exceptional durability and resistance to atmospheric factors. The unique weaving technique gives the fabric transparent properties, allowing for **natural lighting** of the room while **protecting against excessive sunlight** and **heating of the rooms**.

MULTIFUNCTIONALITY

Sparrow Screen Fabric is not only a practical solution but also an **elegant decorative element** that effectively **eliminates light reflections** on monitor screens. This is a key factor for offices and rooms where computer work is an integral part of daily duties. It fits perfectly into **various architectural contexts**, proving itself in both **private and commercial spaces** such as restaurants, stores, or medical offices.

1%

FABRIC OPENNESS LEVEL

The openness level of the screen fabric provides the perfect balance between protection from sunlight and clarity of the outside view. The density of the fabric directly affects the level of UV protection while allowing for the regulation of the amount of light transmitted.

1% is the maximum degree of darkening, ideal for those who value complete privacy.

3% is an intermediate degree of darkening, providing a balance between privacy and access to daylight.

5% is a low degree of darkening, perfect for those who prefer bright and well-lit interiors.

Sparrow Blinds EasyFit Screen

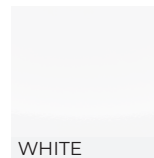

Sparrow Blinds EasyFit Screen External Shade is revolutionizing the external blind market with its unmatched ease of installation and range of sizes, which can be adjusted using telescopic solutions. When designing this product, we focused on simplicity of installation so that anyone can install the blind themselves without the need for professional services. The innovative system allows for **flexible adjustment to most standard window sizes**, eliminating the need to order custom-made blinds while offering quick and hassle-free installation.

Cooperation

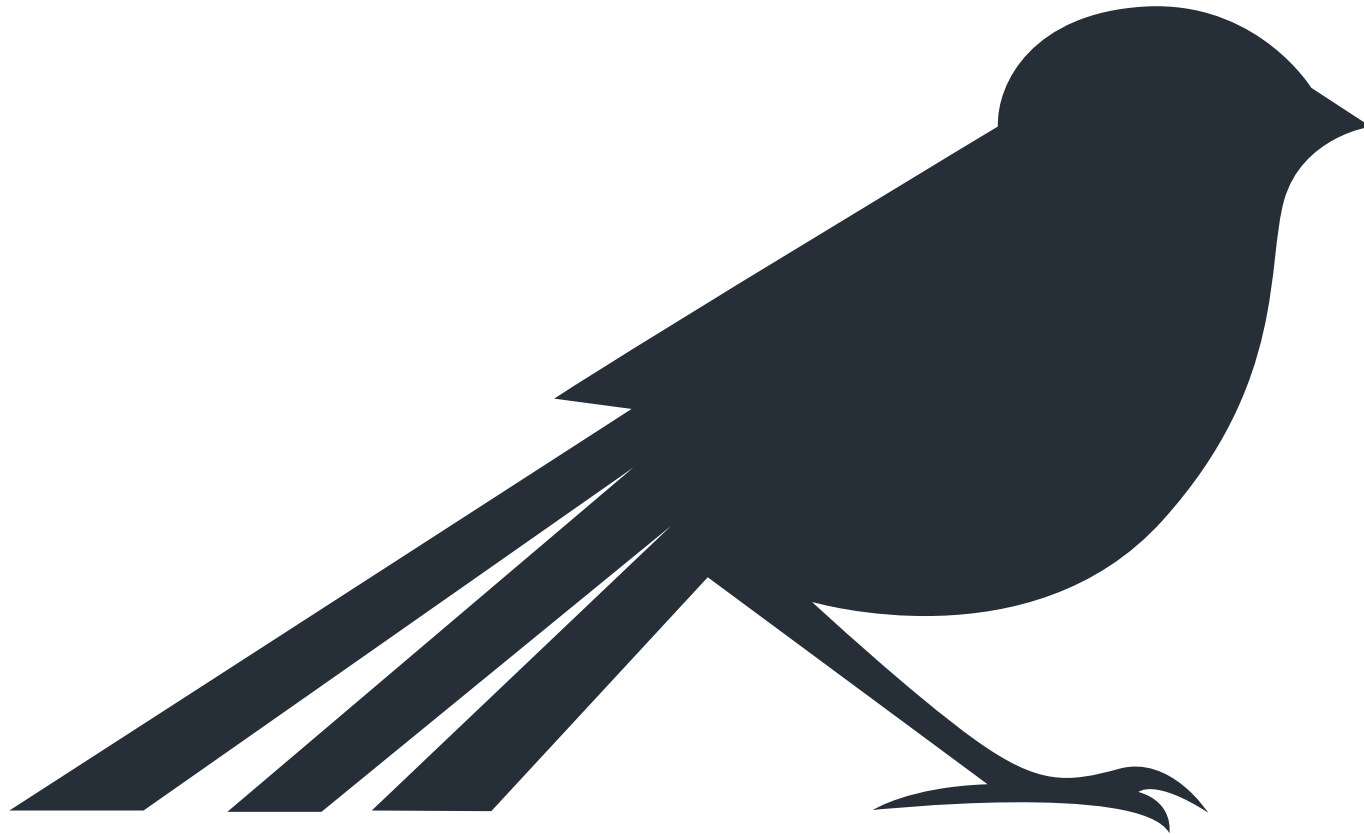

If you are operating in the blinds industry, are a distributor, an architect, or involved in any other aspect of the business related to internal and external blinds, we invite you to collaborate with our company. We have prepared special cooperation conditions for our business partners, which will provide access to the latest products and technological solutions in the field of blinds. We operate on the principle of an individual approach to each customer, therefore we guarantee professional support and comprehensive service at every stage of cooperation. We encourage you to contact us and have a discussion, during which we will explore all possibilities of cooperation and answer any questions. Together we can create products that will meet the needs of even the most demanding customers.
