PRODUCER OF ROLLER BLINDS SYSTEMS

www.sparrowblinds.com

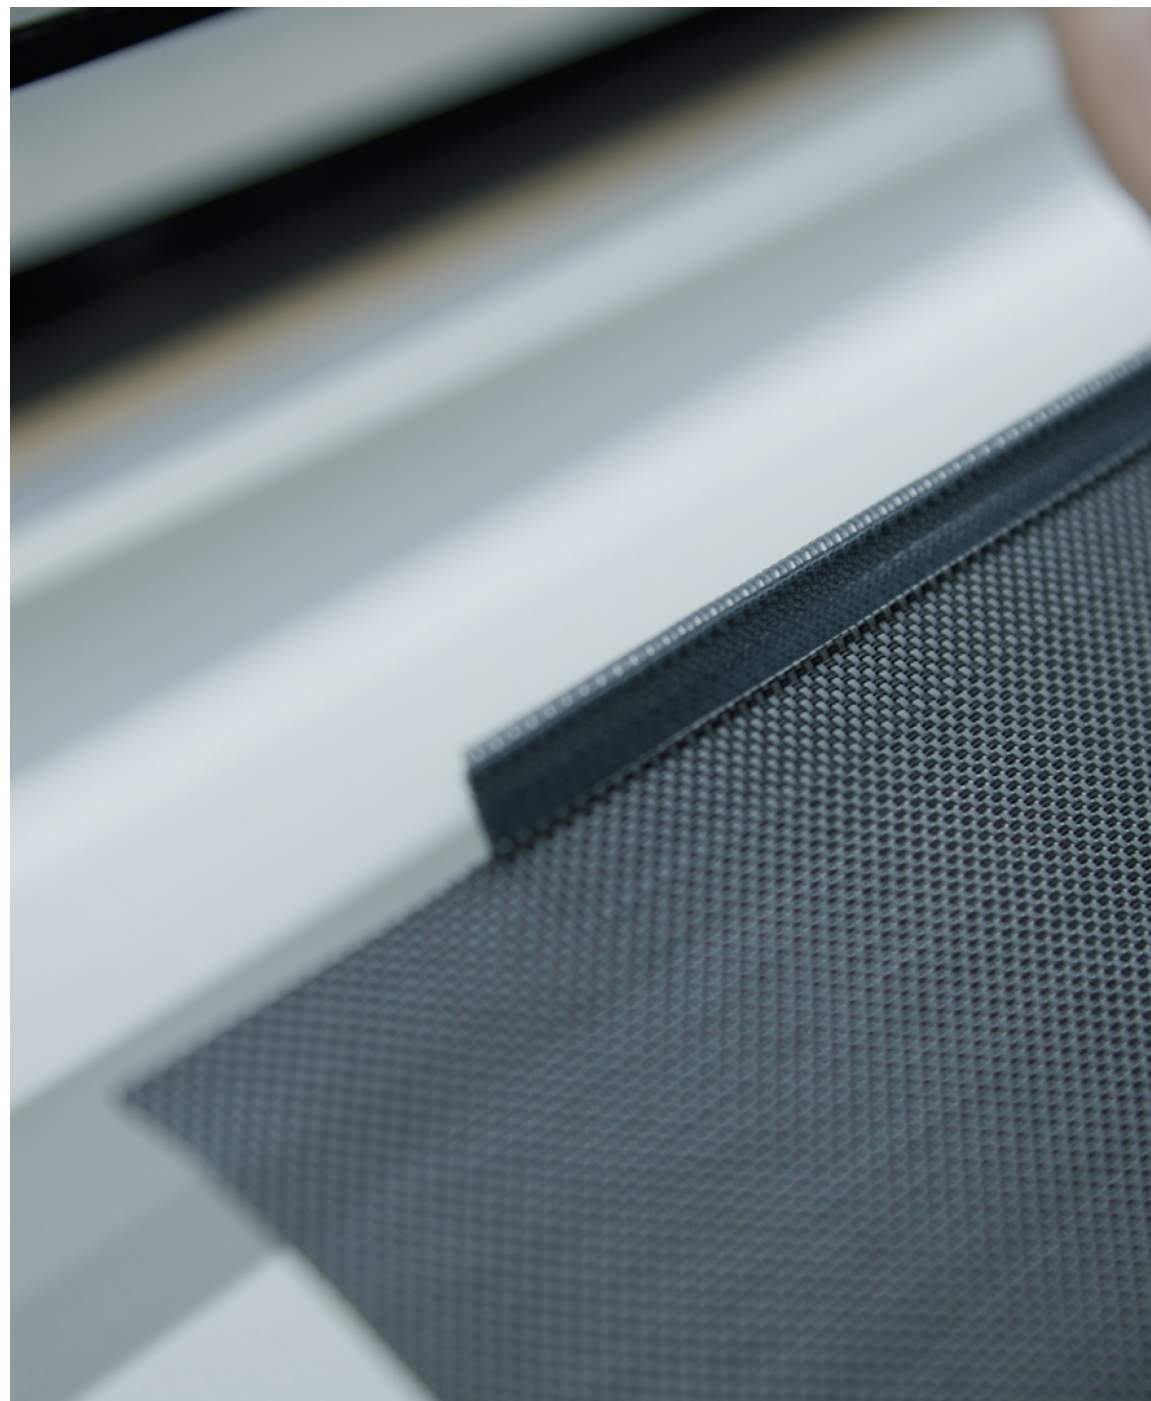

About us

Sparrow Blinds is a unique brand specializing in providing the highest quality window shading solutions. We are a leader in the production and distribution of **fabric roller blinds and Screen blinds**, serving a wide range of customers in Poland and Europe.

Our company is known for creating sunshades with solid finishing and attention to every detail. Each product in our offer is handmade to meet the **highest aesthetic and functional standards**.

We are flexible and adjust our production to the individual needs of the customer. In addition, we offer **customization of Silhouette type blinds** to fit your unique requirements. Our advanced logistics system ensures not only excellent quality but also the **safety of transporting delicate materials**.

Interior systems

DESIGN

The elegant and modern appearance of screen blinds will make them a wonderful addition to any interior, giving it style and class. The material they are made of is of high quality and **effectively protects against sunlight** while providing clear visibility of the surroundings. We have paid equal attention to the practical and functional aspects of screen fabrics as well as their aesthetic potential, striving to make them a decorative element of windows. The offer includes a **rich palette of colors**, which combined with the universal design of cassettes allows for the creation of an individual composition, emphasizing the character of each interior.

Vertical Blind V1

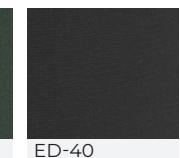

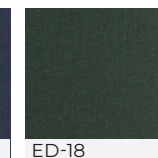

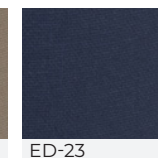

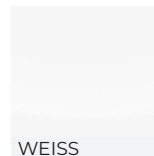

The **vertical blind** has been designed with versatility and elegance in mind, making it perfect for both modern and classic interiors. Its vertical slats allow for precise control over the **amount of light entering the room**, while ensuring the highest level of privacy. The solid construction, based on a reliable mechanism for rotating and sliding the slats, guarantees **smooth operation and long-lasting durability**. The V1 system is easy to install and can be adapted to different window sizes, making it the ideal solution for any type of space.

Due to its minimalist yet stylish design, the V1 roller blind fits harmoniously into a variety of interior designs. A wide selection of materials and colors allows for individual adaptation to the user's needs, giving each room a unique character and elegance.

Bahama Vertical

Bahama Vertical vertical blinds are a unique solution that combines aesthetics with practicality. They are perfectly suited for both residential and commercial spaces, offering **full control over light and privacy**. Thanks to their innovative design, the slats can function as both a blind and a sheer curtain, subtly filtering light and adding a distinctive character to any room.

The Bahama Vertical fabric is an excellent choice for those who want to create a harmonious interior by combining the **elegant look of a curtain** with the **functionality of vertical blinds**. With their unique properties and carefully selected materials, the **Dreamy Bahama Vertical 100 and 500 collections** offer solutions tailored to various interior design needs.

Interior blinds B1

The **B1 day-night** free-hanging blind has been meticulously crafted to deliver optimal functionality and refined aesthetics in any setting. Its innovative light control mechanism, featuring alternating fabric bands, offers precise regulation of both sunlight and privacy. The B1's robust design includes a durable tube that firmly supports the fabric, ensuring a **seamless and effortless operation** via a user-friendly chain. Notably, the B1 system excels in its **ease of installation and removal**, allowing for the full utilization of available window space.

With its sophisticated and contemporary design, the B1 blind effortlessly **complements a wide range of interior styles**, making it an excellent choice for both residential and office environments. Its extensive color options and customizable features ensure that the B1 blind not only meets practical needs but also enhances the overall aesthetic, **adding a touch of elegance to any room.**

Interior blinds B2

The **free-hanging B2 blind** is designed for effective protection against sunlight on large surfaces. Its construction is based on a material stretched over a tube, which is stably supported by a pair of solid brackets. A unique feature in this system is the use of a **precise mechanism** with an adjustable cover, allowing for vertical unrolling of the blind and its control at any angle using a chain. The B2 system is also distinguished by its **ease and comfort of installation** and dismantling, as well as the possibility of full utilization of the window recess width.

The B2 interior blind is an **elegant and practical solution**, suitable for both home interiors and commercial spaces. Its universal design and rich color palette make it easily adaptable to any interior style, giving it a modern and aesthetic character.

Interior blinds B5

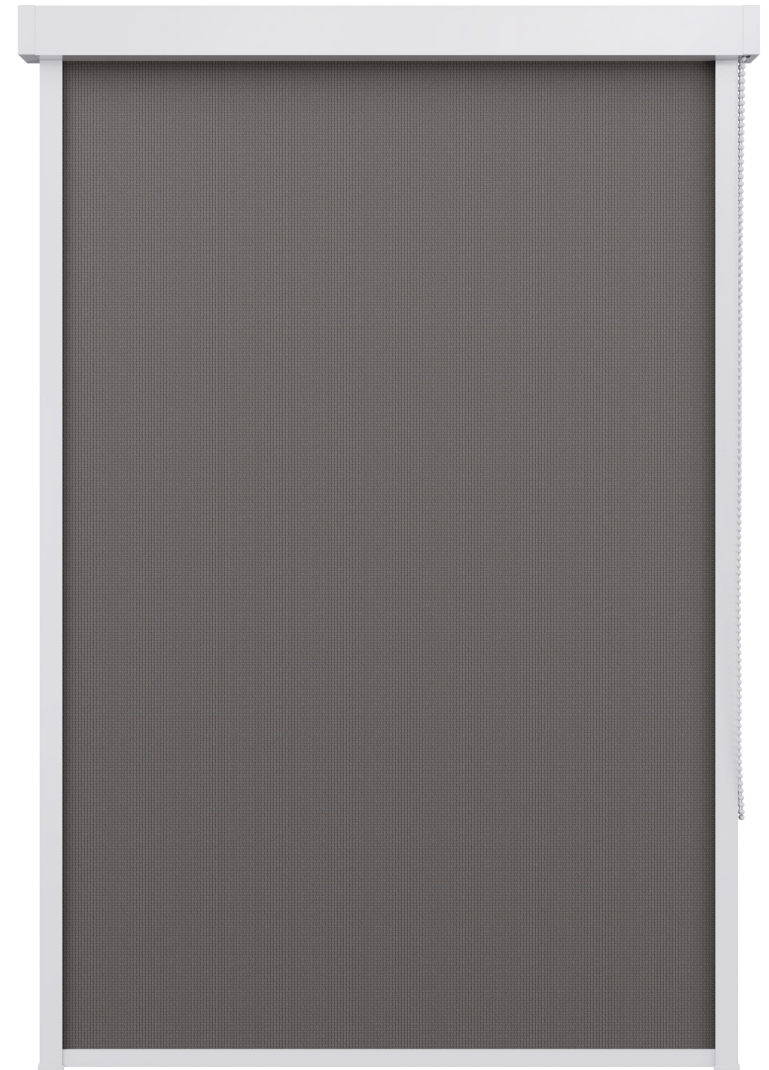

The modern **B5 blind** provides effective protection against intense sunlight while maintaining an elegant appearance. This **minimalist blind** is designed in a small aluminum cassette with a square profile, giving it a stylish look. This system also features a wide range of available colors and a **variety of fabrics**, allowing it to be adapted to any interior.

The B5 blind offers several handling options. It can be easily raised or lowered thanks to a **comfortable chain mechanism** or an optional Smart Blinds motor, making it exceptionally comfortable to use. Thanks to the reinforced foam tape, both the cassette and the guides are securely mounted, ensuring the durability and reliability of the system.

The exclusive design of the B5 and its wide color range allow it to be **matched to any interior style**, giving it a modern and aesthetic look. This blind not only fulfills its sun protection function but also adds elegance and character to any room.

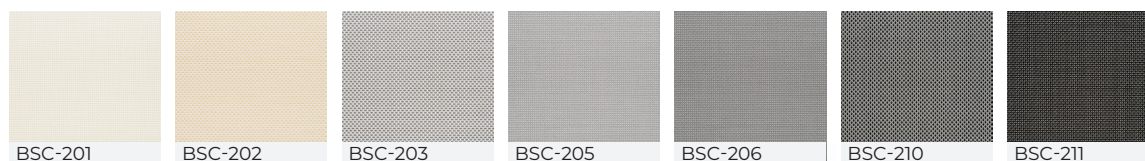

WWW

Control	chain, Smart Blinds motor
Cassette	aluminum, 43.6 mm x 54.9 mm
Fabric	Available in 3 levels of fabric openness 1%, 3%, 5%. Full fabric offer in the later part of the catalog. The presented fabrics come from the BSC II collection.

Interior blinds B5 BIS

The **B5 BIS blind** is an innovative solution among interior blinds, ensuring effective protection against intense sunlight while maintaining an aesthetic and minimalist design. Its construction is based on a compact aluminum cassette with a square profile, giving it a particularly modern look. It is distinguished by a rich palette of colors and a variety of available fabrics, allowing for the perfect adaptation of the blind to every type of interior.

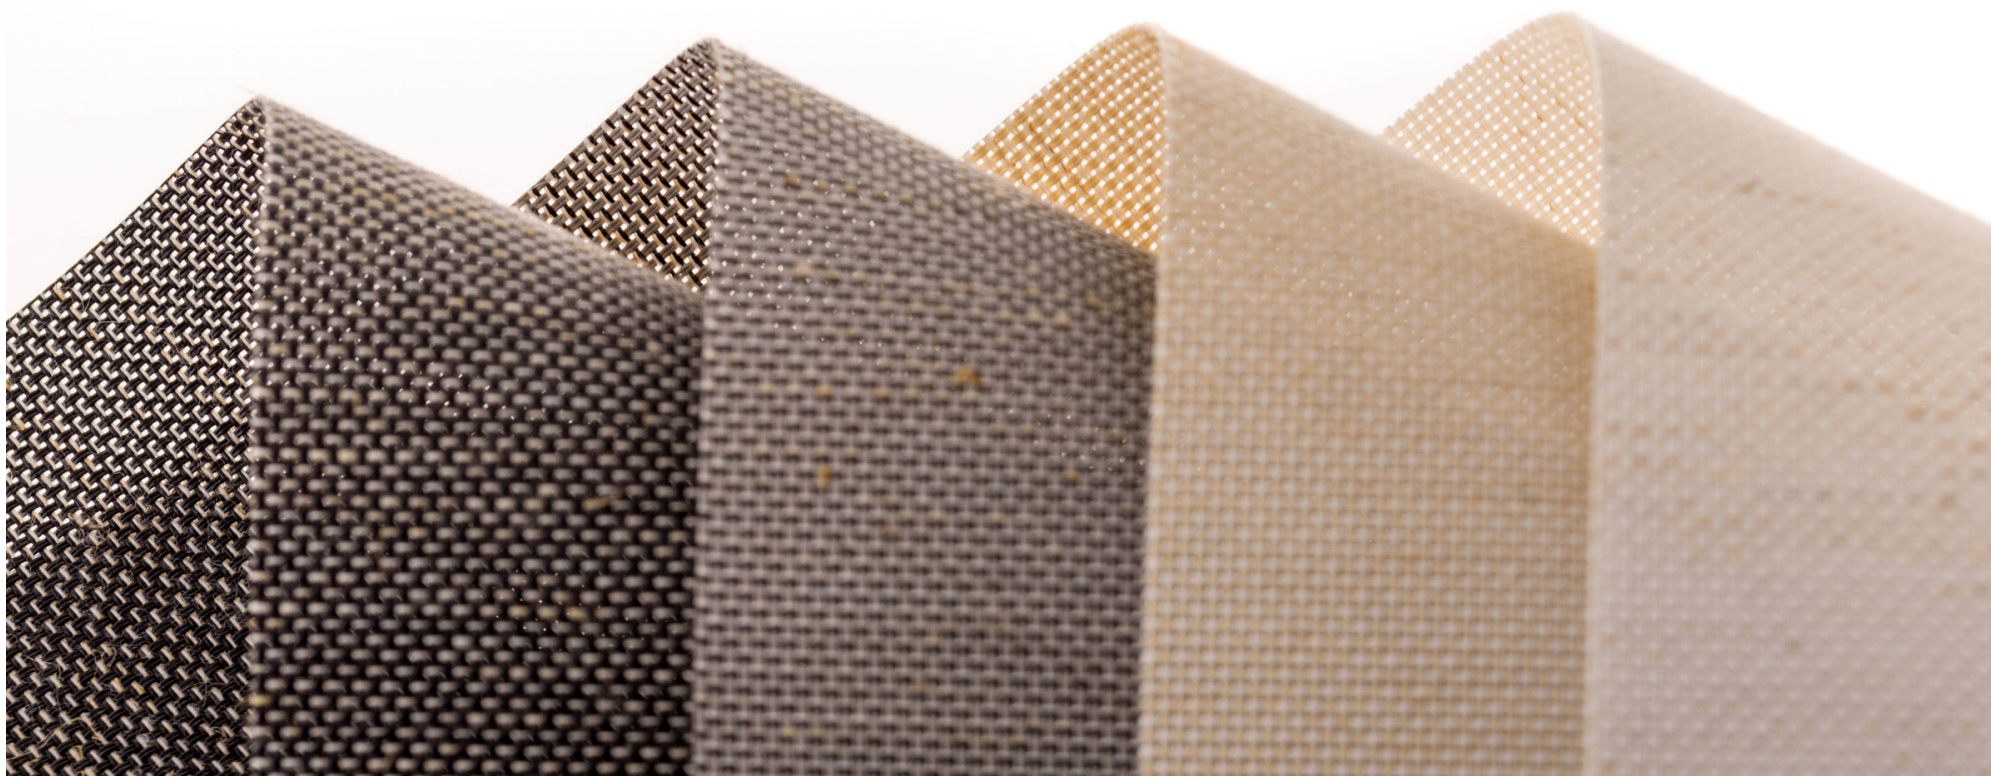

A distinctive feature of the B5 BIS blind is its installation, which can be carried out using a special adhesive tape, allowing it to be **directly attached to the window frame** or glass. This method of installation makes using the blind even more comfortable. Similar to the B5 model, the B5 BIS blind offers the option of operation using a chain mechanism or an optional motor.

The **B5 BIS blind** is an excellent solution for both residential interiors and commercial spaces. Its universal design and color diversity allow it to be adapted to any interior style, giving it a modern and aesthetic look.

WWW

Max. width	1200 mm
Max. height	2100 mm
Max. area	2,52 m ²
Installation	glass
Control	chain, Smart Blinds motor
Cassette	aluminum, 43.6 mm x 47.7 mm
Fabric	Available in 5% fabric openness. Full fabric offer in the later part of the catalog. The presented fabrics come from the BSC IV collection.

Interior blinds B7

The **B7 blind** is a modern and innovative solution, designed for effective protection against sunlight in interiors of various characters. The system is distinguished by an **elegant and durable aluminum cassette** with a round profile and easy operation thanks to the use of side guides and a comfortable chain mechanism, which allows for precise regulation of the amount of light entering the room.

The B7 blind is available in various variants, allowing it to be adapted to the individual needs and preferences of the user. Customers can choose from tubes of different diameters ($\varnothing 18\text{mm}/\varnothing 25\text{mm}$), allowing for even better customization of the blind to a specific interior.

The design of the B7 cassette assumes that the blind does not cover the light of the window, making it a **universal solution** suitable for installation in various types of windows and doors. The installation of the blind is intuitive and convenient, as the cassette and guides are mounted using reinforced foam tape, ensuring the **stability and durability** of the entire system.

Fabric	Available in 5% fabric openness. Full fabric offer in the later part of the catalog. The presented fabrics come from the BSC III collection.

Interior blinds B27

The **B27 blind system** is a versatile solution that is perfect for effective protection against intense sunlight, especially on large surfaces. Its construction has been developed with durability and functionality in mind, meeting even the most demanding requirements.

The B27's aluminum cassette with a rounded profile gives it an **elegant and aesthetic appearance**, making the blind blend well into the interior. It offers 4 tube diameters ($\varnothing 25\text{mm}$, $\varnothing 26\text{mm}$, $\varnothing 28\text{mm}$, $\varnothing 38\text{mm}$, $\varnothing 40\text{mm}$), allowing for individual customization to the size of the window.

B27 features an easy-to-use chain mechanism, with the option of **using an electric motor**, significantly enhancing user comfort. The special shape of the cassette allows for the blind's installation on both the ceiling and the wall, making this system even more versatile and flexible.

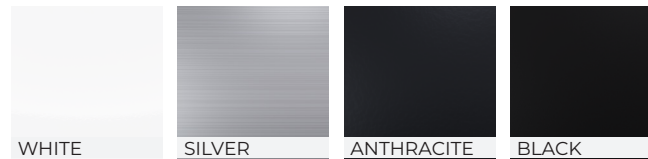

WWW

Max. width	2500 mm
Max. height	2900 mm
Max. area	6,25 m ²
Installation	wall, ceiling, window recess
Control	chain, Smart Blinds motor

Fabric	Available in 5% fabric openness. Full fabric offer in the later part of the catalog. The fabrics come from the BSC V collection.

Interior blinds B50

The **B50 blind system** provides effective protection against intense sunlight, especially on large window surfaces. It stands out for its high quality and stylish design, distinguishing it from other similar solutions.

The B50 is equipped with a precise chain mechanism, allowing easy adjustment of the level of darkening. Its two-part aluminum cassette, forming the B50 structure, ensures **flexible installation**. The rear part of the cassette can be used independently as a mounting rail, and when combined with the front part, it forms a cassette with a square profile, giving the system an **aesthetic appearance**.

Installing the B50 system is straightforward and convenient, based on attaching the cassette with special clips, **ensuring stability and durability**. The B50 is an ideal solution for both home interiors and commercial spaces. The B50 system combines functionality and aesthetics, creating an ideal solution for covering large window surfaces.

Interior blinds B55

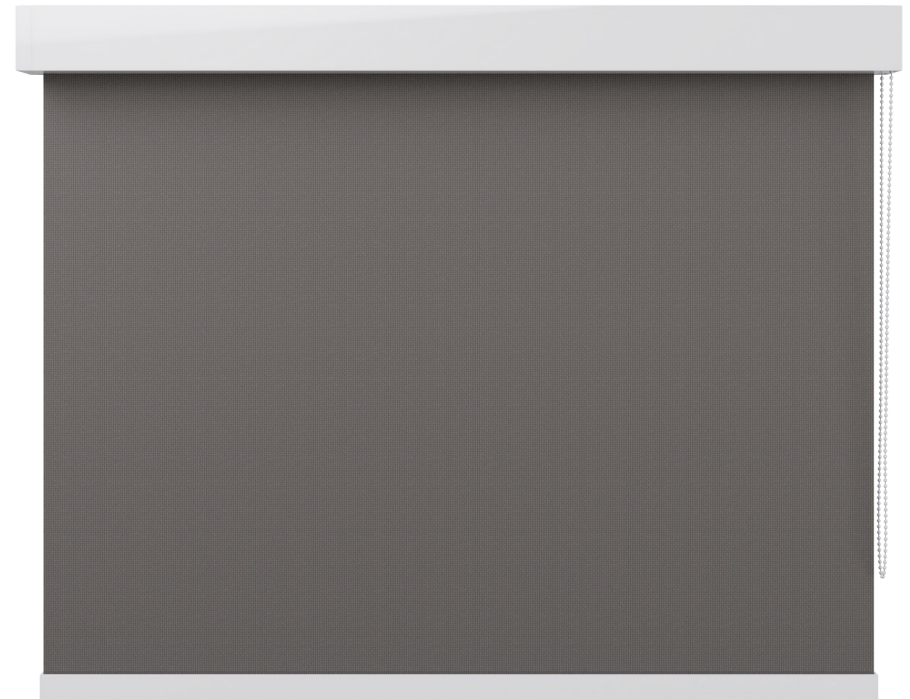

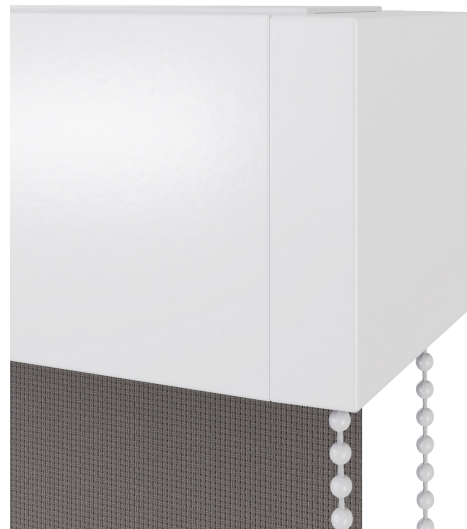

The **B55 blind** guarantees effective protection against sunlight even on the largest surfaces. The system impresses with its high quality and versatile functionality.

The B55 features an elegant aluminum cassette with a square profile and precisely fitted side guides. This system offers a rich selection of screen fabrics. The flexibility of the B55 system is evident in its **various control options**: chain mechanisms, motorized, and modern spring mechanisms, allowing for customization to individual user requirements.

Installing the B55 system relies on using clamping hangers, ensuring the durability and stability of the entire construction. The B55 not only protects against the sun but also **adds elegance to the interior**.

Smart Blinds

Smart Blinds is an innovative device for **remote control** of curtains, blinds, or shutters. You don't have to get up from your chair and go to the window to close or open the blind, as the motor will do it for you. The product is designed to make your space more „smart,“ making your life more comfortable and simpler.

You can control the motor via a **modern mobile app**, using a secure, doubly encrypted ECC connection. The program is available for free download from the Google Play Store or AppStore.

The Smart Blinds motor for curtains, blinds, and shutters is a **universal solution** that fits any type and model of interior blind. Importantly, the motor also works well with already installed blinds.

The motor is compatible with all types of cords and chains. It ensures **smooth, quiet operation**, which enhances the comfort of use. The Smart Blinds motor is particularly suitable for children's rooms.

MODERN MANAGEMENT

The practical app connects to the motor via Bluetooth 4.2 technology. With the app, you can check the position of the blind and control the battery level. The program also allows you to **operate multiple blinds simultaneously** and set several timers for each of them.
