PRODUCER OF ROLLER BLINDS SYSTEMS

www.sparrowblinds.com

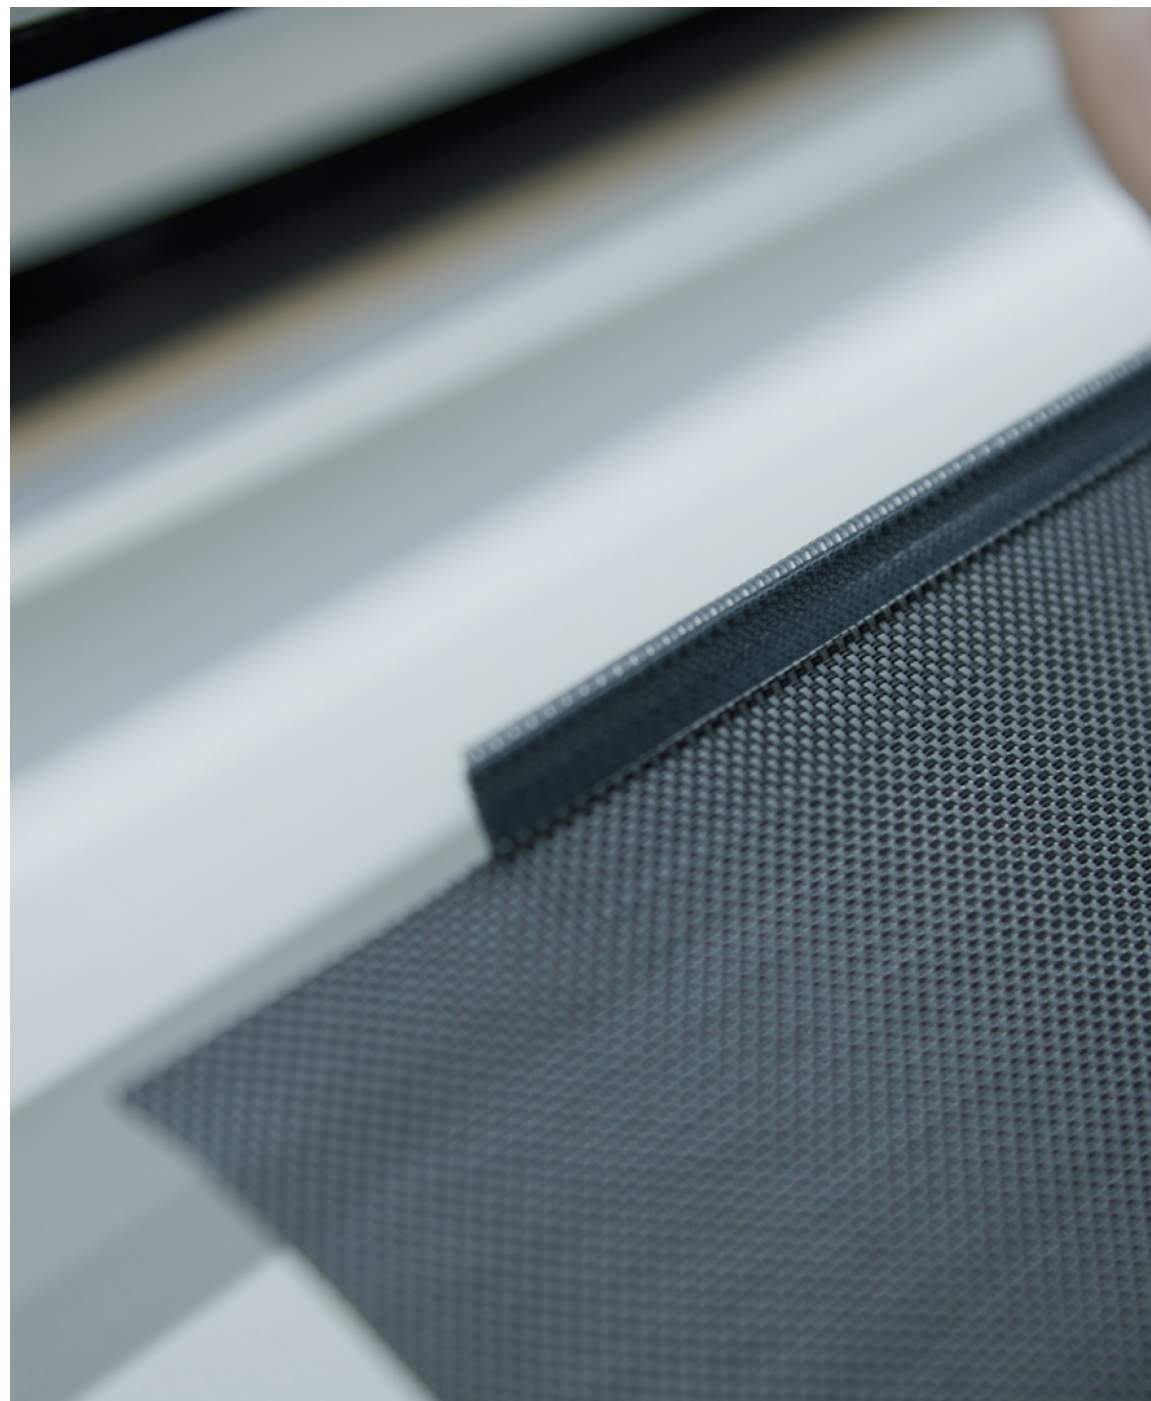

About us

Sparrow Blinds is a unique brand specializing in providing the highest quality window shading solutions. We are a leader in the production and distribution of **fabric roller blinds and Screen blinds**, serving a wide range of customers in Poland and Europe.

Our company is known for creating sunshades with solid finishing and attention to every detail. Each product in our offer is handmade to meet the **highest aesthetic and functional standards**.

We are flexible and adjust our production to the individual needs of the customer. In addition, we offer **customization of Silhouette type blinds** to fit your unique requirements. Our advanced logistics system ensures not only excellent quality but also the **safety of transporting delicate materials**.

Screen fabric

PROPERTIES

Screen Fabric is a unique combination of polyester and polyvinyl chloride, providing **UV protection** at the level of **95% - 99%**. It is a high-quality material, characterized by exceptional durability and resistance to atmospheric factors. The unique weaving technique gives the fabric transparent properties, allowing for **natural lighting** of the room while **protecting against excessive sunlight** and **heating of the rooms**.

MULTIFUNCTIONALITY

Sparrow Screen Fabric is not only a practical solution but also an **elegant decorative element** that effectively **eliminates light reflections** on monitor screens. This is a key factor for offices and rooms where computer work is an integral part of daily duties. It fits perfectly into **various architectural contexts**, proving itself in both **private and commercial spaces** such as restaurants, stores, or medical offices.

1%

FABRIC OPENNESS LEVEL

The openness level of the screen fabric provides the perfect balance between protection from sunlight and clarity of the outside view. The density of the fabric directly affects the level of UV protection while allowing for the regulation of the amount of light transmitted.

1% is the maximum degree of darkening, ideal for those who value complete privacy.

3% is an intermediate degree of darkening, providing a balance between privacy and access to daylight.

5% is a low degree of darkening, perfect for those who prefer bright and well-lit interiors.

MULTIFUNCTIONALITY

Sparrow Screen external blinds are not only an elegant decorative element but **also a practical solution** that effectively eliminates light reflections on monitor screens. This is a key factor for public use spaces, offices, and rooms where computer work is an integral part of daily duties. Proper darkening of the room **provides comfortable working conditions**, increasing efficiency and satisfaction with the tasks performed. Sparrow Screen blinds also enhance security by **protecting the interior from unwanted outside gazes**.

PROPERTIES

The material of Sparrow Screen blinds is resistant to snow and frost, making it an ideal solution for **any type of building**, regardless of the prevailing weather conditions. Additionally, in winter, the screen fabric retains heat in the room, contributing to increased comfort and **reduced heating costs**. Sparrow Screen blinds also provide excellent protection against noise, which is important in locations in noisy and busy urban areas.

Sparrow ZIP Screen

DESIGN

Sparrow Screen blinds **perfectly fit into various architectural contexts**, proving effective in both private and commercial spaces. Their elegant and modern design complements the aesthetics of the interior and enhances its functionality. The blinds are an ideal solution for restaurants, shops, or medical offices, where, apart from their decorative function, they also play a practical role in **protecting the interior from excessive light and heat**.

FABRIC

Sparrow Screen fabric is an innovative solution for external blind systems. It **protects the interior from UV radiation** and excessive heat, acting like a sealed system that creates an insulating layer between the fabric and the glazing. It prevents the interior from heating up and is an excellent **alternative to traditional air conditioning**. Additionally, this material is characterized by high durability and resistance to atmospheric factors, which contributes to the longevity of the blinds.

Sparrow ZIP Screen 103

The ZIP 103 external blind with a 103 mm wide cassette combines efficiency and aesthetics. With a larger cassette, it provides stability and even tension of the screen fabric, resulting in effective protection of the interior from sunlight and heat. It is an excellent choice for those who care about comfort in their surroundings.
